This project helped me learn skills in developing a design that can be rapidly migrated into operational field trials. The coursework, theories, and procedures learned from "ISE 5644 - Auditory Display Design" were put to practice and applied during this project. This project provided me the tools to design a prototype of a system that may be implemented in a real-world setting. I would not have been able to accomplish this from just the coursework in my degree plan.

Thanks, Safe-D,

Alli Rossi-Alvarez
