

Liang Shi: This project helped me learn advanced skills in deep learning and XGBoost models. This project also developed my proposal/technical writing skills and allowed me to reflect on this on paper. This project exposed me to real-world scenarios and research methods and exercised my ability to apply what I learned to solve real-world problems.

Chen Qian: This project provided me a great way to understand traffic safety research and deepen understanding in various statistical models. This project granted me a great chance to work on an academic paper and this paper won me a student paper award in American Statistician Association paper competitions.
