

Student name: Andrei Svetovidov

Academic level: Master's Program; Computer Science, Virginia Tech University

Impact Statement:

I joined Center for Truck and Bus Driving (CTBS) center's Safe-D project as a first year PhD student in computer science department. The academic program was focused around data analysis methods and machine learning, which was beneficial for my project contribution and vice versa. Overall, the project helped me professionally, as I improved my SQL data wrangling and data exploration skills.
