

Student name: Yanmo Weng

Academic level: PhD student, Zachry Department of Civil and Environmental Engineering, Texas A&M University

Impact Statement:

This project greatly enhanced my understanding of writing systematic literature reviews and introduced me to using Latex for composing comprehensive literature review papers. Additionally, I gained proficiency in utilizing the Zotero platform for reference management. Furthermore, my knowledge of ArcGIS improved through learning how data conflation functions with large datasets. Moreover, I acquired the skills to generate reproducible research results by utilizing Google Colab and the R-based knitr platform.

Student name: Valerie Vierkant

Academic level: Undergraduate in Medical Science, Texas A&M University

Impact Statement:

Throughout this project, I acquired valuable expertise in data collection and processing. Additionally, I honed my proficiency in utilizing Zotero to organize references for systemic literature reviews. Moreover, I further enhanced my abilities in efficiently and succinctly editing papers.
